Vitamin K2+D3

Bones support us; connect to form joints essential for mobility; and protect vital organs, the brain, and the spinal cord. They also serve as organs themselves, with the production of both red and white blood cells critical for immunity, vitality, and more. Additionally, the skeletal system is the storage reservoir for 99% of the body's calcium and 85% of its phosphorus; bone tissue selectively releases these nutrients when required throughout the body.

The importance of adequate dietary and supplemental calcium for skeletal health is well recognized; however, research regarding calcium absorption has identified the biologically active vitamins K2 and D3 as critical factors for bone building and renewal.

New Roots Herbal's **Vitamin K2+D3** features 120 µg of K2 as menaquinone-7 (MK7) and 1000 IU of vitamin D3 (cholecalciferol), formulated in a matrix of medium-chain triglycerides. This tandem of nutrients is critical for healthy bones, teeth, and immune performance. Here's how it benefits your health...

Vitamin K2 also serves to activate osteocalcin, the critical compound within osteoblasts (bone building cells) which locks down calcium from the bloodstream to bone mass.

Vitamin D3 enhances calcium and phosphorus absorption into bones for a healthy skeletal system. It also stimulates the synthesis of osteocalcin, the critical cofactor that drives the assimilation of calcium into bones.

Our format features a convenient dropper which allows you to tailor dosage to suit your personal therapeutic requirements.

Each drop contains:

Vitamin K2 (menaquinone-7)	30 mcg
Vitamin D3 (cholecalciferol) (250 IU)	6.25 mcg

Bottle contains approximately 525 drops.

Other ingredient: Medium-chain triglycerides (MCT).

NPN 80080203 · OM0132-R1

Directions of use:

Adults: Take 4 drops daily or as directed by your health-care practitioner.

Manufactured under strict GMP (Good Manufacturing Practices).
